

TMY is an umbrella brand for a very wide variety of yarns tailor-made to suit exact machine or application requirements of the customer. There is an intricate process to define the requirements through an interactive process, which is followed by engineering the product and process of manufacturing the product to meet them. Hundreds of yarns differing in their characteristics have been developed and commercialized. Flexible manufacturing facilities of Indorama, backed by a team of scientists and process engineers facilitate the whole process.

Features:

- ❖ Customer made yarns
- ❖ Custom made quantities

Applications:

Machinery:

- ❖ All type machinery
